The Development Of Energy Conservation Legislation In Australia

Adrian J Bradbrook Energy Research and Development Corporation Australia University of Adelaide

Consistent with the Australian Government's wetlands policy, Defence has contributed towards the Environment Protection and Biodiversity Conservation Act 1999. Defence has completed energy conservation measures resulting in energy savings. The Energy Efficiency Opportunities (EEO) program was established in July. The object of the Act was to improve the identification, evaluation, and reporting about energy efficiency opportunities assessments. Expand Schedule 2A—Content of assessment plan new development or expansion including the name and either the address or Australian Business Number of each developer. Energy efficiency programs—closed energy.gov.au The Energy Efficiency Opportunities (EEO) program was established in July. The object of the Act was to improve the identification, evaluation, and reporting about energy efficiency opportunities assessments. Expand Schedule 2A—Content of assessment plan new development or expansion including the name and either the address or Australian Business Number of each developer.
